2. Title, page 2, line 7.

**Following:** "~~15-6-211~~,"

**Insert:** "15-6-193,"

3. Page 9, line 18.

**Insert:** "Section 4. Section 15-6-193, MCA, is amended to read:

"15-6-193. Extended property tax assistance -- phasein. (1)  
For the purpose of mitigating extraordinary market value increases during revaluation cycles that begin after December 31, 2008, the rate of taxation of class four residential dwellings and appurtenant land not to exceed 5 acres and actually occupied for at least 7 months a year as the primary dwelling of the owner as otherwise set in 15-6-134(2)(a) is adjusted in this section for properties with extraordinary increases in market value with owners that meet income requirements.

(2) An annual application on a form provided by the department is required to receive a tax rate adjustment under this section. The application must be signed under oath. A tax rate adjustment may be granted only for the current tax year and may not be granted for a previous year.

(3) A rate adjustment may not be granted for:

(a) any property that was sold or for which the ownership was changed after December 31 of the last year of the previous revaluation cycle unless the change in ownership is between husband and wife or parent and child with only nominal actual consideration or the change is pursuant to a divorce decree;

(b) the value of new construction, including remodeling, on the property occurring after December 31 of the last year of the previous revaluation cycle that is greater than 25% of the market value of the improvements; or

(c) a land use change occurring after December 31 of the last year of the previous revaluation cycle that increases the market value of the land by more than 25%.

(4) For the purposes of determining the adjustment in the class four property tax rate in this section, the following provisions apply for revaluation cycles beginning after December

31, 2008:

(a) (i) The percentage increase in taxable value is measured as the percentage change in taxable value before reappraisal to the taxable value after reappraisal. The taxable value before reappraisal is calculated by multiplying the value before reappraisal times the result of 1.00 minus the homestead exemption before reappraisal times the tax rate before reappraisal. The taxable value after reappraisal is calculated by multiplying the market value after reappraisal times the result of 1.00 minus the homestead exemption after reappraisal times the tax rate after reappraisal.

(ii) The tax rate before reappraisal is the tax rate that was in effect during the last year of the previous reappraisal cycle.

(iii) The tax rate after reappraisal is the tax rate that will be in effect during the last year of the current reappraisal cycle.

(iv) The homestead exemption before reappraisal is the homestead exemption that was in effect during the last year of the previous reappraisal cycle.

(v) The homestead exemption after reappraisal is the homestead exemption that will be in effect during the last year of the current reappraisal cycle.

(b) The dollar increase in tax liability is measured as the percentage dollar change in tax liability before reappraisal to the tax liability after reappraisal. The tax liability before reappraisal is calculated by multiplying the value before reappraisal times the result of 1.00 minus the homestead exemption before reappraisal times the tax rate before reappraisal times the mill levy applied to the property before reappraisal. The tax liability after reappraisal is calculated by multiplying the market value after reappraisal times the result of 1.00 minus the homestead exemption after reappraisal times the tax rate after reappraisal times the mill levy applied to the property before reappraisal. The mill levy applied to the property before reappraisal is the total of all mills applied to the property in the last year of the previous reappraisal cycle.

(c) Total household income is the sum of the income of all members of the household and all other persons who are owners of the property. Income, as used in this section, includes income from all sources, including net business income and otherwise tax-exempt income of all types but not including social security income paid directly to a nursing home. Net business income is gross income less ordinary expenses but before deducting depreciation or depletion allowance, or both. For an entity, as defined in subsection (8), income also includes the income of any natural person or entity that is a trustee of or controls 25% or more of the entity. A household is an association of persons who live in the same dwelling, sharing its furnishings, facilities, accommodations, and expenses. For single-family rental dwellings,

total household income does not include the income of the tenant.

(d) The phase-in value is the valuation change made pursuant to 15-7-111(3) since the last reappraisal.

(5) (a) If total household income is \$25,000 or less, the percentage increase in taxable value is greater than 24%, and the dollar increase in taxable liability is \$250 or greater, then the property qualifies for an adjusted tax rate. The adjusted tax rate must be calculated such that the total increase in taxable value over the reappraisal cycle is 24% and such that the change in taxable value is phased in over the reappraisal cycle in equal increments.

(b) If total household income is greater than \$25,000 but less than or equal to \$50,000, the percentage increase in taxable value is greater than 30%, and the dollar increase in taxable liability is \$250 or greater, then the property qualifies for an adjusted tax rate. The adjusted tax rate must be calculated such that the total increase in taxable value over the reappraisal cycle is 30% and such that the change in taxable value is phased in over the reappraisal cycle in equal increments.

(c) If total household income is greater than \$50,000 but less than or equal to \$75,000, the percentage increase in taxable value is greater than 30%, and the dollar increase in taxable liability is \$250 or greater, then the property qualifies for an adjusted tax rate. The adjusted tax rate will be calculated such that the total increase in taxable value over the reappraisal cycle is 36% and such that the change in taxable value is phased in over the reappraisal cycle in equal increments.

(d) The adjusted tax rate computed under this subsection (5) must be rounded to the nearest 1/100 of 1%.

(6) A person who applies for a tax rate adjustment under this section shall provide the department with documentation of total household income and other information that the department considers necessary to determine the person's eligibility for the tax rate adjustment. Documents provided to the department to determine eligibility for a tax rate adjustment are subject to the confidentiality provisions in 15-30-303.

(7) A person who applies for a tax rate adjustment and submits a false or fraudulent application for a tax rate adjustment is guilty of false swearing under 45-7-202.

(8) For the purposes of this section, "entity" means:

(a) a corporation, fiduciary, or pass-through entity, as those terms are defined in 15-30-101; and

(b) an association, joint-stock company, syndicate, trust or estate, or any other nonnatural person."
